

FAASTeam presents:

IMC Club Meeting - Mastering the Art of Instrument Navigation

Radio communication is one of the most difficult skills for a pilot to develop. Experience and learning what to expect can help you develop this skill more efficiently. At this meeting we'll show you how you might be able to improve your communication skills. IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building instrument flying knowledge and skills. The organization network promotes a safety culture through continued education and believes that safety and proficiency are developed through education and experience. Monthly meetings offer an opportunity to share in-flight experiences and valuable safety tips. Through the FAA Safety Program, aviation professionals offer informative WINGS presentations. You do not have to be an instrument rated pilot to attend. Membership in the international IMC Club is encouraged but not required. For more information and to attend this event, click the link below and register TODAY!

Directions: The seminar will be held in the conference room below the former restaurant.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
